Environmental Assessment Study

The City of Ottawa has initiated the Airport Parkway Widening and Lester Road Widening Environmental Assessment (EA) Study to determine the most appropriate means to accommodate and manage increasing transportation requirements related to growth in the surrounding communities and airport lands as illustrated in the key map. A Recommended Plan will be developed and evaluated in accordance with Ontario's EA Act, fulfilling requirements as a Municipal Class EA process for a Schedule C project.

The EA process will involve developing, assessing and evaluating alternatives, which will result in a Recommended Plan which will be presented to City Council for approval.

Three open houses will be held during the course of the study to review and discuss the project with residents and solicit feedback. Open house notices will be published in local newspapers and on the City website. Information about the study will also be available on the City's website at www.ottawa.ca/airportparkway

Upon completion of this study an Environmental Study Report will be available for public review and comment. A notice of Study Completion will be published at that time.

Interested persons can provide comments throughout the EA process. Any comments received will be collected under the Environmental Assessment Act and, with the exception of personal information, will become part of the public record.
