### AFFIDAVIT OF BRUCE FINLAY

I, Bruce Finlay, of the City of Ottawa MAKE OATH AND SAY:

1. I am a land use planner in the Community Planning Unit of the Planning, Infrastructure & Economic Development Department of the City of Ottawa.
2. I swore an affidavit for the above noted matter on October 11, 2018.
3. I have since determined that there was an error in the Exhibit "4" attached to said affidavit. The Exhibit was not reproduced in its entirety. As a result, I have attached to this affidavit the corrected Exhibit "4".

SWORN BEFORE ME  
this 15 day of October, 2018

  
\_\_\_\_\_  
BRUCE FINLAY

  
A Commissioner for the Taking of Oaths, etc.  
Kristina Mahon

Exhibit "4"  
Of Affidavit of Bruce Finlay

Recommended Policy Changes  
10<sup>th</sup> October 2018

This is exhibit "4" to the  
affidavit of Bruce Finlay  
sworn before me this 15  
day of October 2018

  
A Commissioner For Taking Affidavits

Document 1 – Settlement Policy Changes

ITEM SECT		OPA 150		Proposed Changes
Density Targets vs Requirements				
35	2.2.2	3. Minimum density requirements, expressed in jobs and people per gross hectare, are set out in Figure 2.3 and applied to those target areas with the greatest potential to support the Rapid Transit and Transit Priority Networks.	1. <b>Figure 2.3- Minimum Density Requirements</b>	Repeal OPA 150 Item 35 a) to reinstate density targets in place of Density requirements  Amend Figure 2.3 to replace the word "Requirements" with the word "Targets"
36	2.2.2	6. All new development within the boundaries of the intensification target areas listed in Figure 2.3 will be required to meet the minimum density requirements. Higher or lower densities may be permitted in a secondary plan that re-allocates density among sites. The Zoning By-law will convert the requirements in Figure 2.3 from gross density to net density and from people and jobs per hectare to dwelling units and gross floor area.	6. All new development within the boundaries of the intensification target areas listed in Figure 2.3 will be required to meet the minimum density requirements. Higher or lower densities may be permitted in a secondary plan that re-allocates density among sites. The Zoning By-law will convert the requirements in Figure 2.3 from gross density to net density and from people and jobs per hectare to dwelling units and gross floor area.	6. New development within the boundaries of the intensification target areas listed in Figure 2.3 will be encouraged to meet the minimum density targets. Higher or lower densities may be permitted in a secondary plan, for a target area, where that Plan re-allocates density among sites to achieve the overall objective of people and jobs. Where phased development is proposed the proponent must demonstrate how the density target will be achieved at build out. Where implemented through Secondary plans and Zoning, the targets in Figure 2.3, will be converted from gross density to net density and from people and jobs per hectare to dwelling units and gross floor area equivalents.
37	2.2.2	7. At the time of implementation, the Zoning By-law may provide exemptions from the minimum density	7. At the time of implementation, the Zoning By-law may provide exemptions from the minimum density	7. At the time of implementation, the Zoning By-law may provide exemptions from the minimum density

54

ITEM SECT

OPA 150

Proposed Changes

43

2.2.2

13. In order to implement the minimum density requirements for all lands in target areas for intensification, the City will:

- a. Review and may update existing community design plans, secondary plans, and zoning to enable achievement of the minimum density requirements. Any necessary amendments will be carried out in consultation with the landowners and local community. Where community design plans, secondary plans or existing zoning provisions contain sufficient development potential to meet minimum density requirements, these requirements shall not be used as the only planning rationale to revise such plans for the purpose of achieving intensification, or to increase the height or density in the current zoning;
- b. Consider the application of a number of alternative measures to provide capacity, including risk management and/or system upgrades in conjunction with its Asset Management Strategy and other City programs where opportunities for intensification are limited because of the cumulative impact of

13. In order to achieve the minimum density targets for the transit "target areas for intensification", in Figure 2.3, the City will:

- a. Review and may update existing community design plans, secondary plans, and zoning to enable achievement of the minimum density targets. Any necessary amendments will be carried out in consultation with the landowners and local community.
- b. Consider the application of a number of alternative measures to provide capacity, including risk management and/or system upgrades in conjunction with its Asset Management Strategy and other City programs where opportunities for intensification are limited because of the cumulative impact of intensification projects on infrastructure system capacity.

ITEM SECT OPA 150

Proposed Changes

		<p>intensification projects on infrastructure system capacity.</p>
<p>44</p>	<p>2.2.2</p> <p>j. Consider the achievement of minimum density <i>requirements</i> on Arterial Mainstreets to represent a longer-term potential, and those Arterial Mainstreets located inside the Greenbelt will be considered to have priority for municipal upgrades over those outside the Greenbelt. On Traditional and Arterial Mainstreets, carry out measures to enhance the pedestrian environment and public realm, such as tree planting, improved sidewalks, and other streetscape improvements, as well as traffic calming measures to help transform these streets from wide, automobile-oriented streets, to urban avenues that exhibit more liveable conditions;</p>	<p>j. Consider the achievement of minimum density <u>targets</u> on Arterial Mainstreets to represent a longer-term potential, and those Arterial Mainstreets located inside the Greenbelt will be considered to have priority for municipal upgrades over those outside the Greenbelt. On Traditional and Arterial Mainstreets, carry out measures to enhance the pedestrian environment and public realm, such as tree planting, improved sidewalks, and other streetscape improvements, as well as traffic calming measures to help transform these streets from wide, automobile-oriented streets, to urban avenues that exhibit more liveable conditions;</p>
<p>88</p>	<p>2.3.2</p> <p>2. In order to provide sufficient water and wastewater system capacity to assist in meeting the City's intensification <i>requirements</i> inside the Greenbelt, the City will:</p>	<p>Repeal OPA 150 Item 88 a) to reinstate the term "targets" in place of the term "requirements"</p> <p>2. In order to provide sufficient water and wastewater system capacity to assist in meeting the City's intensification <u>targets</u> inside the Greenbelt, the City will:</p>
<p>122</p>	<p>2.5.6</p> <p>5. Community design plans and other area-specific plans in developed areas will include the following:</p>	<p>5. Community design plans and other area-specific plans in developed areas will include the following:</p>

26

a. A plan of how the land will develop or re-develop over time, including land uses, open space, public rights-of-way for roads and transit, and connections for walking and cycling;

b. Analysis of how the proposed development will achieve the minimum number of jobs and the density and mix of residential units required by policies in this Plan; where applicable, the density *requirements* in Figure 2.3 may be achieved overall by assigning different levels of density to individual sites;

c. Identification of stable areas and areas suitable for intensification, based on proximity to transit and compatibility with the current or planned character of the surrounding area;

d. Building heights and minimum densities for development parcels or areas within the planning area;

e. Planning and design strategies to support walking and cycling and increased use of transit;

f. Measures to improve the natural heritage system and reduce the impact of development on it;

a. A plan of how the land will develop or re-develop over time, including land uses, open space, public rights-of-way for roads and transit, and connections for walking and cycling;

b. Analysis of how the proposed development will achieve the minimum number of jobs and the density and mix of residential units required by policies in this Plan; where applicable, the density **targets** in Figure 2.3 may be achieved overall by assigning different levels of density to individual sites;

c. Identification of stable areas and areas suitable for intensification, based on proximity to transit and compatibility with the current or planned character of the surrounding area;

d. Building heights and minimum densities for development parcels or areas within the planning area;

e. Planning and design strategies to support walking and cycling and increased use of transit;

<p><b>Intensification and Building Height</b></p>		<p>10. Intensification may occur in a variety of built forms from low-rise to high-rise provided urban design and compatibility objectives are met. Denser development, that often means taller buildings, should be located in areas that support the City's</p>

mix of uses, and in areas that can accommodate large-scale intensification. Building heights and densities for different areas may be established through this plan or a secondary plan and will be implemented through zoning. A secondary planning process, identified in Section 2.5.6 and undertaken for a specific area may recommend a new or changes to an existing secondary plan to establish different building heights. Until more detailed planning is completed in this manner this Plan will include building heights for Target Areas for Intensification. Low-rise intensification will be the predominant form of intensification in the General Urban Area.

11. The distribution of appropriate building heights will be determined by:

- a. The location in a Target Area for Intensification identified in Policy 4 above or by proximity to a Rapid Transit station or Transit Priority corridor, with the tallest building heights generally located closest to the station or corridor; and
- b. The Design and Compatibility of the development with the surrounding existing context and planned function, as detailed in Section 4.11, with

Rapid Transit and Transit Priority networks and in areas with a mix of uses. Building heights and densities for different areas may be established through this plan or a secondary plan and will be implemented through zoning. A secondary planning process, identified in Section 2.5.6 and undertaken for a specific area may recommend a new or changes to an existing secondary plan to establish different building heights. ~~Until more detailed planning is completed in this manner this Plan will include building heights for Target Areas for Intensification.~~ Low-rise intensification will be the predominant form of intensification in the General Urban Area.

11. The distribution of appropriate building heights will be determined by:

- a. The location in a Target Area for Intensification identified in Policy 4 above or by proximity to a Rapid Transit station or Transit Priority corridor, with the greatest density and tallest building heights being located closest to the station or corridor; and
- b. The Design and Compatibility of the development with the surrounding existing context and planned function, as detailed in Section 4.11, with

49

buildings clustered with other buildings of similar height.

12. Building heights are classified in Figure 2.4 and will be used for establishing appropriate height limits in community design plans, secondary plans, the Zoning By-law and other policy plans, in land use designations in Section 3 and when considering amendments to this Plan. The corresponding storey height for a residential use is generally three metres, and for other uses is generally four metres, while at-grade uses may have higher storey heights. Where a secondary plan uses the terms “high-rise” or “high profile”, the building class will be limited to High-Rise 10-30 unless otherwise indicated in that plan. An amendment to the Zoning By-law will be required for any increase in height within that height class.

Figure 2.4

Classification	Maximum Building Height (residential storeys)
Low-Rise	4 storeys or less
Mid-Rise	5 to 9 storeys

buildings clustered with other buildings of similar height.

12. Building heights are classified in Figure 2.4 and will be used for establishing appropriate height limits in community design plans, secondary plans, the Zoning By-law and other policy plans, in land use designations in Section 3 and when considering amendments to this Plan. The corresponding storey height for a residential use is generally three metres, and for other uses is generally four metres, while at-grade uses may have higher storey heights. An amendment to the Zoning By-law will be required for any increase in height within that height class.

Figure 2.4

Classification	Maximum Building Height (residential storeys)
Low-Rise	4 storeys or less
Mid-Rise	5 to 9 storeys
High-Rise	10 to 30 storeys

High-Rise	High-Rise 10-30	10 to 30 storeys
	High-Rise 30+	31 storeys and more

High-Rise 31+	31 storeys and more
---------------	---------------------

13. Building heights are established in Section 3 and in the following policies. However, secondary plans, including site-specific policies in Volume 2 of this Plan may specify greater or lesser building heights than those established in Section 3 where those heights are consistent with the strategic directions of Section 2. Existing zoning that permits a greater height than set out in this Plan will remain in effect.

14. High-Rise 30+ buildings will only be permitted where they are identified in a secondary plan that addresses the requirements of Section 2.5.6 and where the buildings are:

- a. Located in the Central Area, a Mixed Use Centre or Town Centre; and
- b. Preferably located within 200 metres walking distance of a Rapid Transit Station identified on Schedule D to maximize transit use but will not be considered at a distance beyond 400 metres walking distance; and

13. Where a Secondary Plan refers to building form as Low, Medium or High profile they will have the same meaning as Low-, Medium- or High-Rise in Figure 2.4 unless otherwise indicated in that Plan.

14. Building heights are established in Section 3 and in the following policies. However, secondary plans, including site-specific policies in Volume 2 of this Plan may specify greater or lesser building heights than those established in Section 3 where those heights are consistent with the strategic directions of Section 2. Existing zoning that permits a greater height than set out in this Plan will remain in effect.

15. High-Rise 31+ buildings will only be permitted: where they are identified in a secondary plan that addresses the requirements of Section 2.5.6; or permitted by an amendment to an existing secondary plan that already allows High-rise buildings; and where the High-Rise 31+ buildings will be:

- a. located generally within 400 metres walking distance of a Rapid Transit Station, identified on Schedule D, to maximize the use of transit.

c. Separated from planned low-rise residential areas by a suitable transition as required by Section 4.11 policies 11 and 12.

15. The Location of High-Rise 10-30 and 30+ buildings is influenced by the need to provide an adequate separation distance from other existing and potential future High-Rise buildings, as detailed in Section 4.11. The Zoning By-law may establish specific separation distances. Development of a High-Rise Building may require consolidation of two or more lots in order to address separation distance requirements.

16. For Official Plan amendments to increase building heights that are established in Section 3 of this Plan, or in a secondary plan, the proponent must demonstrate that the following criteria are met:

- a. the impacts on the surrounding area (e.g. the community design plan study area) have been assessed comprehensively;
- b. the direction in Policy 10 above is met;
- c. the requirements of policies 13 through 16 of Section 2.5.6 where the proposal involves a High-Rise 10-30 or High-Rise 30+ building; and

b. separated from planned low-rise residential areas by a suitable transition as required by Section 4.11 policies 11 and 12.

16. The Location of High-Rise and High-Rise 31+ buildings is influenced by the need to provide an adequate separation distance from other existing and potential future High-Rise buildings. Separation distances between buildings are to be considered when considering sites for development of a High-Rise Building and High-Rise31+ buildings. The City may implement separation distances through the Zoning By-law. In areas with a small or narrow lot fabric consolidation of two or more lots may be in order to address separation distance requirements.

17. For Official Plan amendments to increase building heights that are established in Section 3 of this Plan, or in a secondary plan, the proponent must demonstrate that the following criteria are met:

- a. the impacts on the surrounding area (e.g. the community design plan study area) have been assessed comprehensively;
- b. the direction in Policy 10 above is met;

**ITEM SECT OPA 150**

**Proposed Changes**

	<p>d. an identified community amenity is provided.</p>	<p>c. the requirements of policies 13 through 16 of Section 2.5.6 where the proposal involves a High-Rise or High-Rise 31+ building; and</p> <p>d. an identified community amenity is provided.</p>
<p>127</p>	<p>2.5.6</p> <p>12. Community design plans and other area-specific plans are implemented by the City in partnership with property owners, the community, other levels of government and other parties, using a variety of strategies shown in Figure 2.9. Each plan will include an action plan that identifies projects and priorities for all parties and that links proposed municipal actions to City work programs and budgets. A Financial Plan will show the cost of capital investments and the source of funding.</p> <p><b>Provisions for High-Rise 10-30 and High-Rise 30+ Buildings</b></p> <p>13. Secondary plans and community design plans should locate any High-rise 10-30 and High-rise 30+ buildings within proximity of a rapid transit station with the tallest buildings generally located close to the station. These buildings should be clustered with other buildings of similar height. Building heights should decline as the distance from the transit station</p>	<p>12. Community design plans and other area-specific plans will be prepared and implemented by the City in partnership with property owners, the community, other levels of government and other parties, and guided by the strategies shown in Figure 2.9. Each plan will include an action plan that identifies projects and priorities for all parties and that links proposed municipal actions to City work programs and budgets. A Financial Plan will show the cost of capital investments and the source of funding.</p> <p><b>Provisions for High-Rise and High-Rise 31+ Buildings</b></p> <p>13. The City intends that the highest density of development, including High-rise buildings, locate where rapid transit is being provided. Secondary plans and community design plans should locate high-rise buildings proximate to rapid transit stations to support that objective. High-rise buildings are also a built form that requires detailed attention to urban design and their impacts on the existing communities</p>

increases and transition to surrounding areas of lower building height as per Section 4.11.

14. In areas where buildings of 31 storeys and more are permitted in a community design plan, the plan will include a public view and skyline analysis to assess the impact of potential building on significant public view corridors and skyline. Skyline refers to the complete or partial distant view o the city's tallest buildings and structures against the background of the sky. This analysis will:

- a. Consider any existing studies on public views and skyline;
- b. Identify significant public view corridors by identifying significant landmarks to which views shall be protected (such as Parliament Buildings, Gatineau Park, and other important national, civic and local landmarks), and significant public vantage points; and
- c. Identify the existing skyline and determine the impact and appropriateness of the potential High-rise "B" building.

into which they are located. Building design and appropriate transitions, such as those identified in Section 4.11, should be provided to reduce impacts on existing developed areas.

14. Where a secondary plan proposes High Rise 31+ storey buildings for a specific area the City will:

- a. Assess the impact of this type of development on the City's Skyline and incorporate policies to identify and protect prominent views and vistas where they are determined to exist. Skyline refers to the complete or partial distant view of the city's tallest buildings and structures against the background of the sky. This assessment will include:
  - i. Consideration of any existing studies on public views and skyline; and
  - ii. Identification of any significant public view corridors by identifying significant landmarks to which views shall be protected (such as Parliament Buildings, Gatineau Park, and other important national, civic and local landmarks), and significant public vantage points; and

15. The City shall consider the following criteria when determining locations of High-Rise 30 +buildings during the community design planning process:

- a. A prominent location fronting on streets, lanes, public open space and other public land preferably on three sides;
- b. Potential for negative shadow or microclimate impacts;
- c. Provision in the plan for a mix of uses within the area or within the building;
- d. Conservation, retention and renovation of designated heritage buildings and significant heritage resources in their entirety.
- e. Where a site has good transportation access, and is positioned with appropriate buffers to mitigate impact on established low rise neighbourhoods as per Section 4.11

16. The community design plan may include additional provisions to guide the review of development proposals for High-rise 30+ buildings, such as:

- iii. Identification of the existing skyline and determine the impact and appropriateness of any proposed buildings 31 storeys or more.
- b. Consider the following:
  - i. A prominent location or locations fronting on streets, lanes, public open space and other public land preferably and good transportation access;
  - ii. Avoiding or mitigating negative shadow or microclimate impacts such as the creation of excessive wind and providing insufficient sunlight in adjacent public spaces;
  - iii. The provision of a mix of uses within the building or the surrounding area to service residents or business tenants within the building and the broader community;
  - iv. Conservation, retention and renovation of designated heritage buildings and significant heritage resources.
  - v. Building transition and the mitigation of impacts on adjacent low-rise neighbourhoods through building design, massing as per Section 4.11.

ITEM SECT		OPA 150		Proposed Changes	
			<p>a. The identification of priority community amenities and the mechanisms by which they will be provided;</p> <p>b. Provision of a public institutional use;</p> <p>c. How to encourage architectural excellence and sustainable design;</p> <p>d. Mitigation of shadowing and microclimate impacts;</p> <p>e. Other elements or considerations identified in the community design plan.</p>		<p>vi The identification of priority community amenities or public institutional uses that may be required and the mechanisms by which they will be provided.</p> <p>vii Mechanisms to encourage architectural excellence and sustainable design.</p> <p>viii Any specific requirements identified during the secondary planning process.</p>
137	3.6.1	<p>3. Except as provided by Policy 4 below, or by Policy 12 in Section 2.2.2, the maximum building height in the General Urban Area will continue to be low-rise, being four storeys or less, and within this range changes in height will be evaluated based on compatibility with the existing context and the planned function of the area. The design and compatibility policies in this Plan also apply. The tallest buildings will be encouraged to locate on properties fronting Arterial Roads, or adjacent to existing taller buildings. Existing zoning that permits building heights greater than those in this section will remain in effect.</p>	<p>3. Building height in the General Urban Area will continue to be predominantly Low-Rise. Within this range, changes in building form, height and in density will be evaluated based on compatibility with the existing context and the planned function of the area. Secondary plans or zoning that currently permit building heights greater than four storeys will remain in effect.</p> <p>4. Notwithstanding Policy 3 new taller buildings may be considered for sites that;</p> <p>a. front an Arterial Road identified on Schedules E or F of this Plan and which are:</p>		

ITEM SECT

OPA 150

Proposed Changes

4. Notwithstanding the building heights specified in Policy 3, greater heights may be considered in the following circumstances and where the urban design and compatible development policies in Section 4.11 are met:

a) up to six storeys where the property fronts on and has vehicular access to an Arterial Road on Schedules E or F of this Plan and is located:

- i) within 800 metres walking distance of a Rapid Transit Station on Schedule D of this Plan, or
- ii) on a Transit Priority Corridor on Schedule D of this Plan. For the purposes of this policy only, the "Transit Street" defined in the Riverside South Community Design Plan is considered an Arterial Road.

b) subject to a zoning amendment for infill up to a height that does not exceed the height permitted by adjacent existing development or planned function and where all of the following criteria are met:

- i) the site is within 800 metre walking distance of a Rapid Transit station or 400 metres

- i) within 800 metres walking distance of a Rapid Transit Station on Schedule D of this Plan, or
- ii) on a Transit Priority Corridor on Schedule D of this Plan. For the purposes of this policy only the "Transit Street", defined in the Riverside South Community Design Plan, is considered an Arterial Road, or:

- b. are in an area already characterised by taller buildings or sites zoned to permit taller buildings.

**Proposed Changes**

	<p>other characteristics of existing lots preclude a change in use or small-scale intensification.</p> <p>37. The City will review the Zoning By-law with respect to parking requirements in different areas of Ottawa in order to implement the policies of this Plan.</p>	<p>other characteristics of existing lots preclude a change in use or small-scale intensification.</p> <p>37. In order to achieve the parking objectives identified in policies 32-36 above the City will consider, and may implement, parking requirements differently based on geographical location, the contextual influences, the timing of the provision of full transit service and anticipated phasing of development.</p>
--	---	--

**Secondary Plans and CDPs**

<p>123</p> <p>2.5.6</p>	<p>6. Community design plans and other area-specific plans will implement Council's design guidelines, and the design policies in this Plan, through provisions for development parcels within the planning area.</p> <p>Council's design guidelines will apply in all planning areas and will be referenced but not repeated in the plan.</p> <p>7. A secondary plan to implement a community design plan is required to apply provisions for building height and density and may include other elements, such as those listed in Policy 4 above. This approach will ensure that proposed changes in the plan for individual development parcels are considered within the context of the planning area and the plan's objectives are achieved over time.</p>	<p>6. Secondary Plans, Community Design Plans and other secondary planning processes used to guide the development of a community, area or site should reference the design policies of this Plan and the City's design guidelines and identify their applicability in terms the of the community and area context.</p> <p>7. A secondary plan will be required where a community design plan or other secondary planning process proposes greater building heights than those permitted by the Official Plan. This approach will ensure that taller buildings are considered within the context of the plan's objectives for the area over the long-term.</p>
-------------------------	--	--

ITEM SECT		OPA 150		Proposed Changes	
124	2.5.6	8.	<p>A secondary plan to implement a community design plan or other secondary planning process may not be needed in the following circumstances:</p> <ul style="list-style-type: none"> <li>a. A community design plan or other area-specific plan is undertaken primarily to direct changes to the Zoning By-law if the Zoning By-law amendment is brought to City Council concurrently for approval; and</li> <li>b. The plan is prepared in keeping with the policies in Section 3 for Urban Expansion Study Area and Developing Communities (Expansion Area) and through this process, a secondary plan is not required.</li> </ul>	8.	<p>A secondary plan is not required where a community design plan or other secondary planning process, that conforms to the Official Plan, is undertaken to:</p> <ul style="list-style-type: none"> <li>a. direct changes to the Zoning By-law which is brought to City Council concurrently for approval; or</li> <li>b. the plan is prepared in keeping with the policies of either Section 3.11 Urban Expansion Study Area or 3.12 Developing Communities (Expansion Area);</li> </ul>
127	2.5.6	12.	<p>Community design plans and other area-specific plans are implemented by the City in partnership with property owners, the community, other levels of government and other parties, using a variety of strategies shown in Figure 2.9. Each plan will include an action plan that identifies projects and priorities for all parties and that links proposed municipal actions to City work programs and budgets. A Financial Plan will show the cost of capital investments and the source of funding.</p>	12.	<p>Community design plans and other area-specific plans will be prepared and implemented by the City in partnership with property owners, the community, other levels of government and other parties, and guided by the strategies shown in Figure 2.9. Each plan will include an action plan that identifies projects and priorities for all parties and that links proposed municipal actions to City work programs and budgets. A Financial Plan will show the cost of capital investments and the source of funding.</p>

Provisions for High-Rise 10-30 and High-Rise 30+ Buildings

13. Secondary plans and community design plans should locate any High-rise 10-30 and High-rise 30+ buildings within proximity of a rapid transit station with the tallest buildings generally located close to the station. These buildings should be clustered with other buildings of similar height. Building heights should decline as the distance from the transit station increases and transition to surrounding areas of lower building height as per Section 4.11.

14. In areas where buildings of 31 storeys and more are permitted in a community design plan, the plan will include a public view and skyline analysis to assess the impact of potential building on significant public view corridors and skyline. Skyline refers to the complete or partial distant view o the city's tallest buildings and structures against the background of the sky. This analysis will:

- a. Consider any existing studies on public views and skyline;
- b. Identify significant public view corridors by identifying significant landmarks to which views shall be protected (such as Parliament Buildings,

Provisions for High-Rise and High-Rise 31+ Buildings

13. The City intends that the highest density of development, including High-rise buildings, locate where rapid transit is being provided. Secondary plans and community design plans should locate high-rise buildings proximate to rapid transit stations to support that objective. High-rise buildings are also a built form that requires detailed attention to urban design and their impacts on the existing communities into which they are located. Building design and appropriate transitions, such as those identified in Section 4.11, should be provided to reduce impacts on existing developed areas.

14. Where a secondary plan proposes High Rise 31+ storey buildings for a specific area the City will:

- a. Assess the impact of this type of development on the City's Skyline and incorporate policies to identify and protect prominent views and vistas where they are determined to exist. Skyline refers to the complete or partial distant view of the city's tallest buildings and structures against the background of the sky. This assessment will include:

Gatineau Park, and other important national, civic and local landmarks), and significant public vantage points; and

c. Identify the existing skyline and determine the impact and appropriateness of the potential High-rise "B" building.

15. The City shall consider the following criteria when determining locations of High-Rise 30+ buildings during the community design planning process:

a. A prominent location fronting on streets, lanes, public open space and other public land preferably on three sides;

b. Potential for negative shadow or microclimate impacts;

c. Provision in the plan for a mix of uses within the area or within the building;

d. Conservation, retention and renovation of designated heritage buildings and significant heritage resources in their entirety.

e. Where a site has good transportation access, and is positioned with appropriate buffers to mitigate

- i. Consideration of any existing studies on public views and skyline; and
  - ii. Identification of any significant public view corridors by identifying significant landmarks to which views shall be protected (such as Parliament Buildings, Gatineau Park, and other important national, civic and local landmarks), and significant public vantage points; and
  - iii. Identification of the existing skyline and determine the impact and appropriateness of any proposed buildings 31 storeys or more.
- b. Consider the following:
- i. A prominent location or locations fronting on streets, lanes, public open space and other public land preferably on three-sides and good transportation access;
  - ii. Avoiding or mitigating negative shadow or microclimate impacts such as the creation of excessive wind and providing insufficient sunlight in adjacent public spaces;
  - iii. The provision of a mix of uses within the building or the surrounding area to service

105

	<p>impact on established low rise neighbourhoods as per Section 4.11</p> <p>16. The community design plan may include additional provisions to guide the review of development proposals for High-rise 30+ buildings, such as:</p> <ul style="list-style-type: none"> <li>a. The identification of priority community amenities and the mechanisms by which they will be provided;</li> <li>b. Provision of a public institutional use;</li> <li>c. How to encourage architectural excellence and sustainable design;</li> <li>d. Mitigation of shadowing and microclimate impacts;</li> <li>e. Other elements or considerations identified in the community design plan.</li> </ul>	<p>residents or business tenants within the building and the broader community;</p> <ul style="list-style-type: none"> <li>iv. Conservation, retention and renovation of designated heritage buildings and significant heritage resources.</li> <li>v. Building transition and the mitigation of impacts on adjacent low-rise neighbourhoods through building design, massing as per Section 4.11.</li> <li>vi. The identification of priority community amenities or public institutional uses that may be required and the mechanisms by which they will be provided.</li> <li>vii. Mechanisms to encourage architectural excellence and sustainable design.</li> <li>viii. Any specific requirements identified during the secondary planning process.</li> </ul>
<p>238</p> <p>4.1</p>	<p>1. Secondary plans, villages and urban areas and site-specific policies found in Volume 2 provide more detailed policy directions for specific areas or neighbourhoods. The policies and plans in Volume 2 must conform to the policies and plans in Volume 1 of the Plan, except where policies in Volume 1 indicate</p>	<p>1. Secondary plans, for villages and urban areas and site-specific policies found in Volume 2 provide more detailed policy directions for specific areas or neighbourhoods. The policies and plans in Volume 2 must conform to the policies in Volume 1 of the Plan, except where policies in Volume 1 indicate otherwise.</p>

ITEM SECT		OPA 150		Proposed Changes	
		<p>otherwise. However, the policies in Volume 2 may be more restrictive than the policies in Volume 1 of the Plan.</p>		<p>Secondary plans and site specific policies in Volume 2 may be more restrictive than the policies in Volume 1 of the Plan.</p>	
<b>Mixed Use Centres and Mainstreets</b>					
146	3.6.2	<p>3. Mixed Use Centres are priority areas for undertaking more detailed secondary planning and adopting or updating community design plans and secondary plans. These plans may:</p> <ol style="list-style-type: none"> <li>a. Provide for minimum and maximum building heights that are different from those identified in this Section;</li> <li>b. Allocate the minimum density required by this Plan on a site-specific basis, or increase the minimum density, such that not all sites achieve the minimum density but the required density is achieved overall in the area;</li> <li>c. Develop area-specific design considerations.</li> </ol> <p>4. Except where a secondary plan specifies otherwise or existing zoning permits greater heights, building heights are:</p>		<p>3. Mixed Use Centres are priority areas for undertaking a more detailed Secondary Plans. These plans may:</p> <ol style="list-style-type: none"> <li>a. Provide for minimum and maximum building heights;</li> <li>b. Apply the target density for the area, identified in Figure 2.3, or require different densities to be achieved on a site-specific basis such that over time the overall target density is achieved for the area;</li> <li>c. Develop area-specific design considerations.</li> </ol> <p>4. In order to achieve the employment targets for Mixed Use Centres and the target density within walking distance of existing and proposed stations on the City's Rapid Transit System, a range of building heights, including High-Rise may be considered. Appropriate transition in building height is to be provide at the periphery where the Mixed Use Centre abuts established Low-Rise or Mid-Rise areas.</p>	

	<p>a. A maximum of 12 storeys, providing transition to adjacent low-rise residential in accordance with Section 4.11;</p> <p>b. A minimum of four storeys for residential and office development.</p> <p>5. Greater building heights may be considered subject to an amendment to the secondary plan or site-specific policies in Volume 2, and must demonstrate consistency with Policy 2.2.2(17) and all other relevant policies in this Plan.</p>	
<p>158</p> <p>3.6.3</p>	<p>2. The symbol delineating Traditional and Arterial Mainstreet designations on Schedule B of this Plan is a stand-alone land use designation and not an overlay. The Traditional and Arterial Mainstreet designations generally apply to the whole of those properties fronting on the road to a maximum depth of 200 metres, for very deep lots. However, the boundary is flexible depending on site circumstance and lot configuration. For instance, it may also include properties on abutting side streets that exist within the same corridor. A secondary plan may specify a greater or lesser depth.</p>	<p>2. The symbol delineating Traditional and Arterial Mainstreet designations on Schedule B of this Plan is a stand-alone land use designation and not an overlay. The Traditional and Arterial Mainstreet designations generally apply to the whole of those properties fronting on the road, however, for very deep lots the designation will generally be limited to a depth of 200 metres from a Traditional Mainstreet and to a depth of 400m from an Arterial Mainstreet. The boundary may also be varied depending on site circumstance and lot configuration. For instance, it may also include properties on abutting side streets that exist within</p>

ITEM SECT		OPA 150		Proposed Changes	
161	3.6.3	<p>11. This Plan supports mid-rise building heights up to six storeys on Traditional Mainstreets, unless a secondary plan states otherwise. Building heights greater than those specified in this Section will only be permitted through a Secondary Plan. The Zoning By-law may establish building heights lower than six storeys based on site conditions, existing character and compatibility. The Zoning By-law will establish a minimum building height equivalent to a two-storey building, except for those existing gas bars, service stations, automobile sales and drive-through facilities identified in Policy 8 above.</p>	<p>11. This Plan supports Mid-Rise building heights on Traditional Mainstreets but secondary plans may identify circumstances where different building heights may be permitted. In the absence of a Secondary Plan the Zoning By-law may establish as-of-right building heights lower than those permitted above based on site conditions, existing character and compatibility. The Zoning By-law will establish a minimum building height equivalent to a two-storey building, except for those existing gas bars, service stations, automobile sales and drive-through facilities identified in Policy 8 above.</p>	<p>the same corridor. A secondary plan may specify a greater or lesser depth.</p>
